Industry Type	Industry Specific	Work Description
Administration		
Office		
Photocopying		
End of Industry Specific: Office		
End of Industry Type: Administration		
All Industry Types		
All Trades		
Accept load to vehicle from forklift (3rd Party operator) and Loading by hand		
Acceptance of delivery to site for materials		
Charging of Li-Ion batteries for use with cordless tools		
Connect hose to existing water supply tap		
Driving in and out of carparks and on customer premises		
Driving in and out of carparks and on customer premises		
Inspect and drive passenger/ light commercial vehicle		
Listening to music while working		
Monitoring and review of JHA		
Monitoring and Review of SWMS		
Safety inspection and use of Forklift		
Site orientation of domestic residence		
Site Orientation/ Induction		
Sweeping Floor or ground		
Unloading of shipping container with forklift and by hand		
Vacuum		
Working in Cold Conditions		
Working in High Wind Conditions		
Working in hot conditions		
Working in the rain		
Write up incident report		
End of Industry Specific: All Trades		
End of Industry Type: All Industry Types		
Automotive and Plant		
Mechanical		
Inspection and use of Four Post Vehicle Hoist		
Inspection and use of Two Post Vehicle Hoist		
on site Servicing to diesel powered vehicle		
Replace diesel fuel filters		
Replace petrol fuel filters		
Safety inspection and use of TTL Hydraulic Torque Wrench and hydraulic pump		
Safety inspection and use of TTS Hydraulic Torque Wrench and hydraulic pump		

Safety inspection and use of TTX Hydraulic Torque Wrench and hydraulic pump

Servicing to vehicle in workshop

### End of Industry Specific: Mechanical

#### Servicing

Change Spark Plugs

Check batteries and charging system

Check system for gas leaks

Grease moving parts and greaseable joints

Inspect/ Repair skirts and scrubber or sweeping brushes

Inspection and use of petrol powered air compressor

Jack up vehicle/machine

on site Servicing to petrol powered vehicle

Open engine cover/ bonnet/ service compartment

Remove and replace wheels using a pneumatic rattle gun

Replace air filter

Replace brake pads using a pneumatic rattle gun

Replace engine oil and filters

Replace hydraulic hose

Replace hydraulic oil and filters

Replace radiator coolant

servicing a ride on electric sweeper (Complete Job)

servicing a walk gas operated behind sweeper/scrubber (Complete Job)

Servicing to hybrid industrial automatic ride on sweeper/scrubber

Servicing to hybrid industrial automatic ride on sweeper/scrubber (Complete job)

Tune engine

### End of Industry Specific: Servicing

#### End of Industry Type: Automotive and Plant

#### Cleaning

#### All Cleaning industries

Carpet Cleaning

Inspection and use of electric high pressure water sprayer

Inspection and use of petrol powered blower/ vacuum

### End of Industry Specific: All Cleaning industries

#### Commercial Cleaning

Clean bathroom

Clean Glass shower screen with a cloth

Clean Glass with a cloth

Clean mirror with a cloth

Clean Window Using Pure Water Technology

Clean Windows Using rope Access

Clean Windows with mop and squeegee

Cleaning of hard surfaces

Cleaning of office and showroom

Cleaning of residence

Cleaning of Rest Rooms / Toilets

Gain access to work are using Rope Access  
Inspection and use of Carpet Extractor  
Inspection and use of High-Speed Propane (LPG) Powered Floor Buffer (Burnisher)  
Inspection and use of Low-Speed Electric Floor Buffer  
Inspection and use of planetary floor polisher  
Inspection and use of walk behind battery powered floor scrubber  
Remove bag from bins and waste paper baskets  
Steam cleaning of tiles

#### End of Industry Specific: Commercial Cleaning

#### Domestic Cleaning

Mopping Floor

#### End of Industry Specific: Domestic Cleaning

#### End of Industry Type: Cleaning

#### Construction

#### Air Conditioning and Refrigeration

Access ceiling space via Ladder  
Core hole through masonry wall with a battery powered rotary hammer drill  
Cut aluminium angles using a hacksaw and mitre box  
Cut copper pipe with tube cutter  
Cut hole into existing plasterboard ceiling using a key hole plasterboard saw  
Cut Steel/ Unistrut with drop saw  
Disconnect pipework form existing plant  
Filling & testing of pipework  
Fit Pipe insulation over pipes  
Fit Unistrut brackets onto masonry wall  
Fix aluminium channels to existing slab using battery powered hammer drill  
Hang condensing unit onto masonry wall  
Hang Fan cooler unit inside cool room  
Install ceiling registers  
Install flexi ductwork and zone motors in ceiling space  
Install insulated ceiling panels to cool room  
Install new wall mounted unit  
Install TX Valve  
Installation of Cool Room  
Installation of ducted system air conditioner  
Installation of new refrigeration System to new supermarket (complete job)  
Installation of refrigeration system to cool room  
Installation of support angles or channels to hanging rods  
Installation of threaded rod hanging bars  
Installation of underfloor refrigeration pipework  
Installation of wall hung split system air conditioner  
Mixing Polyurethane Isocyanate in a bucket using an electric drill  
Mount condensing unit onto preinstalled Unistrut brackets  
Place copper pipes into trench ducting  
Pour Polyurethane Isocyanate into pipe duct

Pressure testing of pipework with nitrogen and charge with refrigerant (HCFC)  
Reclaim refrigerant gas from existing system  
Refrigerant charge the system using a vacuum pump  
Remove existing wall mounted unit  
Replacement of ducted system air conditioner  
Replacement of wall hung split system air conditioner  
Run connecting copper pipework and fit off  
Run Pipe work through existing ceiling space  
Secure pipework to structure with saddles  
Silver solder copper pipes together  
Stand up cool room panels and fit into bottom track

#### End of Industry Specific: Air Conditioning and Refrigeration

#### All Trades

Acceptance of delivery to site for materials via Crane Truck  
Access roof via Boom Lift  
Access roof via fixed access ladder  
Access roof via Ladder  
Access Roof via scaffold stair access  
Access roof via Scissor Lift  
Access work area using a platform ladder  
Access work area using a step ladder  
Access work area via a mobile scaffold  
Access work area via a scaffold/ working at heights from a scaffold  
Apply touch up paint  
Carrying materials from storage area to work area  
Claim Work Area  
Cleaning up work area  
Cut materials using an electric mitre saw  
Cut steel using a battery powered angle grinder  
Cut Steel using an Angle Grinder  
Cut strapping off around pack of materials  
Drill hole into masonry surface with a battery powered rotary hammer drill  
Drill hole into masonry surface with an electric rotary hammer drill  
Drill hole using a Battery Powered Drill  
Drill hole using an electric drill  
Erection and use of mobile scaffold  
High Risk Construction Work covered in this SWMS  
Inform facilities / operations and security personnel of work location(s)  
Inspect and drive passenger/ light commercial vehicle on or off site  
Inspection and use of Generator  
Inspection and use of petrol powered high pressure water sprayer  
Install screws using a Battery Powered Drill  
Install screws using a tek gun  
Loading Materials onto roof using an EWP  
Loading materials onto truck using a crane and by hand

Marking Out Slab or Ground  
Move materials using a trolley (sack Truck)  
Moving materials around on a trolley  
Push Wheel Barrow on site  
Refuelling of machinery  
Repeat the above process steps until completion of task  
Safety Check And Use Of Boom Lift (extended version)  
Safety Check And Use Of Scissor Lift (Extended version)  
Undertake Clients general all sites induction  
Using an Angle Grinder  
Using an Existing roof anchorpoint system  
Welding with a portable Electric Welder  
Working at height from a boom lift  
Working at height from a scissor lift  
Working at heights - Genrally  
Working in isolation

#### End of Industry Specific: All Trades

#### Bricklaying

Acid wash surface by hand  
Bricklaying  
Bricklaying to new project home  
Carry blocks by hand  
Carry bricks using a mechanical brick carrier (Clamps)  
Cut bricks using a petrol powered brick saw  
Cut bricks using an angle grinder  
Installation of lintel by hand  
Installation of viscourse  
Load bricks onto scaffold by hand  
Mixing cement with a portable petrol powered mixer  
Set up mortar boards  
Set up Profolds to corners  
Wash down brick wall

#### End of Industry Specific: Bricklaying

#### Carpentry

1st fix carpentry to new 2 story dwelling using a Pneumatic and Impulse Nail Gun  
1st fix carpentry to new dwelling using a Pneumatic and Impulse Nail Gun  
Apply construction adhesive using a caulking gun  
Create temporary work bench using trestles and planks  
Cut fibre cement sheeting using electric shears  
Cut fibre cement sheeting using hand operated mechanical shears  
Cut timber beading using a hand saw and mitre box  
Cut timber using a battery powered circular saw  
Cut timber using a battery powered reciprocating saw  
Cut timber using a circular saw  
Cut timber using a jigsaw

Cut timber using a reciprocating saw

Cut timber using an electric mitre saw

Daily preoperational inspection of a Pneumatic (Air) Nail Gun

Daily preoperational inspection of an Impulse (gas) Nail Gun

Ease/ adjust existing doors

Fix fibre cement cladding sheet in place and nail by hand

Fix fibre cement soffit/ eaves sheet in place and nail by hand

Inspection and use of electric air compressor

Install "STRUCTAflor" particle board flooring

Install ceiling joist, Hanging beams, stabilisers, etc

Install plywood flooring

Install solid strip timber flooring (Secret Fix) to timber subfloor

Install timber roof trusses by hand

Installation of Doors and Door Hardware

Installation of eaves linings to new domestic residence

Installation of floor joist

Installation of Timber Purlins

Manufacture timber wall frames using a mitre saw and an Impulse (gas) Nail Gun

Manufacture timber wall frames using a mitre saw and Pneumatic (Air) Nail Gun

Mark out slab using a chalk line

Measure for cladding above roof

Measure perimeter of house

Nail timber using a pneumatic (Air) nail gun

Nail timber using an Impulse (gas) Nail Gun

Passing up Sheets and Accessories from the ground

Position floor boards together using a plank jack/ floor dog

Removal of existing doors

Set up trestle scaffold

Stand up wall frames

End of Industry Specific: Carpentry

Civil

Arrive at domestic site with truck and establish unloading area

Arrive at domestic site with truck and trailer and establish unloading area

Back Fill trench by hand with original spoil

Back Fill trench using excavator with original spoil

Clean street and footpath

Compact area using a petrol powered leg rammer

Compact area using a petrol powered vibrating plate

Compact area with Road roller (roller-compactor)

Cutting Bitumen with a Quick Cut Diamond blade saw

Daily preoperational inspection of a Pneumatic Jack Hammer

Delivery and unloading of mobile plant

Delivery, Safety Check And Use Of Dingo

Dig Hole by hand

Dig hole with power driven auger

Dig Trench by hand

Dig trench using a chain trencher

Dumping/Unloading load on ground using a tip truck/ dump truck

Inspect and drive Tip Truck/ Dump Truck

Inspection and use of diesel powered air compressor

Inspection and use of Motor Grader/ Road Grader

Installation of lintel using a skid steer loader

Laying asphalt with paver which is filled from tipper

Laying blue metal paver which is filled from tipper

Load skid steer loader onto trailer using aluminium ramps

Load skid steer loader onto truck using aluminium ramps

Mixing concrete with a portable mixer

Move soil by hand using a shovel

Operation of drilling rig and soil sampling

Place rubble around domestic site using a skid steer loader

Planning for wet weather and flooding events

Raising Sewer/ Stormwater Pits and Valve covers in an existing bitumen roadway

Remove and fit attachments on Excavator

Remove and fit attachments on skid steer loader

Remove rubbish and debris from domestic site using skid steer loader and truck

Remove soil from domestic site using a skid steer loader and truck

Remove spoil from auger using wheel barrow

Safety check and operation of Excavator

Safety check and operation of Excavator for trenching and excavations

Safety inspection and use of skid steer loader

Safety inspection and use of wheeled front end loader

Set up and use laser level

Site Set Out

Spread rubble around site using a skid steer loader

Spreading soil with Shovel and Rake

Tack coating (including use of hand lance) prior to laying asphalt

Unload skid steer excavator from trailer using aluminium ramps

Unload skid steer loader from trailer using aluminium ramps

Unload skid steer loader from truck using aluminium ramps

Using a pneumatic Jack Hammer/ pneumatic Breaker/ Demolition Hammer

#### End of Industry Specific: Civil

#### Concrete and Concrete Repair

Abrasive blasting

Apply high strength repair mortar

Apply surface sealant material (Kahfill) to face of crack

Concrete and reinforcement repairs

Concrete crack repair and injection

Concrete Delivery and Pumping

Dig Hole by hand

Dig Trench by hand

Finishing concrete with petrol powered trowel (Helicopter)

Injection of Nitofill LV epoxy resin

Install damp proof membrane (Forticon plastic)

Mixing concrete with a portable mixer

Place steel reinforcing mesh

Placing Concrete

Pouring Concrete

Pouring Concrete Slab using a pump and a helicopter

Water ingress repair using XYPEX

#### End of Industry Specific: Concreter and Concrete Repair

#### Demolition

Cut masonry wall with a Quick Cut Diamond blade saw

Cut steel using a reciprocating saw

Cutting Concrete with a Quick Cut Diamond blade saw

Demolition of cupboards and built in robes

Demolition of existing plasterboard lined partition stud wall

Demolition/ removal of bathroom fixtures and fittings

Demolition/ Removal of existing carpet and underlay

Demolition/ removal of existing Compactus shelving unit

Demolition/ Removal of existing vinyl flooring

Demolition/ Removal of existing wall and floor tiles using an elec jack hammer

Jimmy/ prise fixtures away from wall

Knock out bricks using a hammer

Lower materials to ground with ropes

Part demolition of existing brick wall to form new opening

Remediation of asbestos contaminated soil by hand and using general hand tools

Removal of asbestos adhesive from hard surface

Removal of Asbestos products

Removal/ demolition of existing suspended exposed grid ceiling

Remove asbestos clothing

Remove existing suspended ceiling tiles

Remove nuts using a battery powered rattle gun

Remove screws using a battery powered drill

Removing friable asbestos by hand

Removing friable asbestos-contaminated soil by hand and using an excavator

Removing non friable asbestos by hand

Removing non-friable asbestos-contaminated soil by hand and using an excavator

Safety check and operation of Excavator for demolition works

Safety Inspection and use of Hydraulic Rock Breaker

Safety Inspection and use of Hydraulic Shear attachment

Spray PVA Glue with an electric airless sprayer

Using an electric Jack Hammer/ Electric Breaker/ Demolition Hammer

#### End of Industry Specific: Demolition

#### Electrical

Connect new cables into electrical plant/ equipment

Connect new cables into existing switchboard  
 Dig Trench by hand  
 Disconnect electrical from existing plant  
 Fill out and issue Electrical Certificate of Compliance  
 Fit power point to plasterboard wall  
 Fit switch to plasterboard wall  
 Install Inverter  
 Install isolator  
 Install Mounting brackets and rails to roof  
 Install solar panels onto the mounting frame  
 Installation of cable tray  
 Installation of Cable Tray Covers  
 Installation of catenary cable  
 Installation of Solar System to Domestic Dwelling  
 Isolate power to existing system  
 Replace existing light fittings  
 Rewire in conduits between light fittings  
 Run Cables and secure to catenary cable  
 Run Cables through existing ceiling space  
 Secure conduits to structure with saddles  
 Test the electrical installation  
 Tracing and identifying existing live lighting circuits - for fault purposes  
 Working in ceiling space

End of Industry Specific: Electrical

Fencing

Cut fence sheets with electric shears  
 Delivery and installation of temporary fencing  
 Install chainmesh fencing  
 Install posts  
 Install star pickets using a hammer and Star Post Dropper  
 Installation of Panel fencing  
 Installation of post and rail metal clad fencing  
 Installation of temporary fencing  
 Mix concrete in a wheel barrow  
 Removal of temporary fencing  
 Screw fence sheets to rail using a battery powered drill

End of Industry Specific: Fencing

Fire Protection

Connect new cables into existing fire panel  
 Fit speakers and detectors to plasterboard ceiling  
 Install suspended fire pipework to underside of concrete slab  
 Install suspended fire pipework to underside of roof purlins  
 Run Pipe work and cables through existing ceiling space  
 Thread pipe using a Portable Power Pipe Threader  
 Working in a confined space

### End of Industry Specific: Fire Protection

#### Floor Finisher and Coverer

- Inspection and use of Diamond Floor Grinder
- Install Carpet and underlay to a concrete floor
- Install Carpet and underlay to a timber floor
- Install vinyl skirting
- Install vinyl floors

### End of Industry Specific: Floor Finisher and Coverer

#### Formworker

- Install 'Bondek' or Similar formwork to structure Using an Explosive Power Tool
- Install bearers and joists to formwork support frames
- Install plywood formwork to support framing
- Installation of formwork support frames
- Installation of simple formwork
- Stripping formply
- Using an Explosive Power Tool

### End of Industry Specific: Formworker

#### General Building

- Clean up site by hand using a wheel barrow to transfer debris to bin
- Construction Site Establishment and Project Risk Assessment
- Install Acro prop
- Project Risk Assessment
- Refurbishment of residence/ unit
- Remove existing silicone

### End of Industry Specific: General Building

#### Glazier

- Carrying Window frames from storage area to work area
- Cut aluminium sections using an electric mitre saw
- Install Aluminium deflection head and sub sill
- Install glass into frame
- Install window frames into deflection head and sub sill
- Unload glass from vehicle onto trolley

### End of Industry Specific: Glazier

#### Height Safety

- Inspect and certify the anchor point installation
- Inspect and certify the static line installation
- Install anchor points into existing concrete slab
- Install Horizontal Life line fixed to masonry wall
- Install Horizontal Life line fixed to overhead concrete
- Install Horizontal Life line fixed to overhead structural steel
- Install Horizontal Life line surface mounted to metal roof sheeting
- Install modular access ladder to structural wall girts behind wall cladding
- Install modular access ladders to existing masonry wall
- Install Pull down attic ladder into plasterboard ceiling and steel framing
- Install Pull down attic ladder into plasterboard ceiling and timber framing

Install Pull down attic ladder into suspended exposed grid ceiling

Install rafter mounted anchor points to a tiled roof

Install Rafter Mounted anchor points to tiled roof without edge protection

Install roof access hatch into a metal roof

Install Surface Mounted anchor points to metal roof

Install Surface Mounted anchor points to metal roof without edge protection

Measure and mark out for system installation

Run and Connect Static Line Cable

Twin rope rescue via pick off and take to ground

Using a Harness and Static Line

#### End of Industry Specific: Height Safety

#### Home Improvements

Build Steel Wall Frame and Bolt Wall Girths to Columns

Build Wall Frame and Tek Screw Wall Girths to Columns

Drill Wall Girths and Purlins with an electric drill

Installation of Garage (Domestic Shed) complete job

Installation of Roller Door (domestic)

Installation of Steel Portal Roof Trusses by hand

Installation of Steel Roof Purlins by hand

Installation of Steel Wall Girths by hand

Installation of Temporary Height Safety System - Starting from Platform Ladder

Installation of wall sheeting from Ground

Mixing concrete with a portable mixer

Push Wheel Barrow on site

Srew fixing wall sheeting from platform ladder

Stand up clad walls

Wash out mixer

#### End of Industry Specific: Home Improvements

#### Joinery

Install prefabricated steel counter frames

Adjust hinges to joinery doors

Cut timber to size using a table saw

Grinding/ Polishing bench tops with a handheld grinder

Install wall mounted cupboards to stud wall

Install cupboards

Install Kick plate

Install pre laminated bench top

Install timber wall linings

Installation of new kitchen joinery

Lay Hebel panels into frames and grout into position

#### End of Industry Specific: Joinery

#### Landscaping

Acceptance of delivery of concrete

Install irrigation poly pipe and fittings

Installation of subsurface irrigation system

Installation of Synthetic Turf  
Lay brick pavers  
Planting of trees and shrubs by hand  
Preparation and installation of synthetic turf  
Prepare and lay brick pavers  
Screed sand  
Sweeping sand over pavers and into cracks  
Trowel cement to edges of pavers

#### End of Industry Specific: Landscaping

#### Louvres

Install louvre blades into mullion/ blade carriers  
Install louvre doors into existing masonry opening  
Install louvre mullions to existing steel girths using a battery powered drill  
Installation of Horizontal Sunshade Panels into position by hand  
Installation of louvre members - Using a boom lift  
Loading Louvre members onto roof using a crane  
Manually lift panel into position

#### End of Industry Specific: Louvres

#### Maritime

Inspection and use of tender vessel

#### End of Industry Specific: Maritime

#### Mechanical Services

Connect temporary power supply and test operation of hoist  
Final connections and commissioning of lift  
Install hoist motor  
Installation of four post vehicle hoist  
Installation of four post vehicle hoist (complete job including pick up and del)  
Installation of scissor lift vehicle hoist (complete job inc pick up and del)  
Installation of two post vehicle hoist  
Installation of two post vehicle hoist (complete job including pick up and del)  
Lift Car Installation and Fit Out  
Lift Installation  
Lift Shaft Fitout  
Lift shaft rail installation into Masonry shaft  
Plumb Lift Shaft  
Removal and Replacement of gantry crane radio control unit  
Routine Inspection of 2 post vehicle hoist  
Routine Inspection of 4 post vehicle hoist  
Routine Inspection of scissor lift vehicle hoist

#### End of Industry Specific: Mechanical Services

#### Painting and Decorating

Fill holes and imperfections  
Painting of ceilings  
Painting of walls  
Painting of Walls and Ceilings

Plumbing

Back Fill trench by hand with original spoil

Clean trenches and setting grade by hand

Clearing a blocked drain using an Electric Eel – Drain Snake

Connect pipes together using a flexible connector

Connect sewer drain to government connection

Connect water inlet and outlet

Cut down UPVC risers using a battery powered angle grinder

Cut down UPVC risers using an angle grinder

Cut into existing earthenware branch using and angle grinder

Dig Trench by hand

Drain water system

Drill hole into existing concrete slab with an electric rotary hammer drill

Electro-Fusion Welding of MDPE or HDPE pipe

Fit “T”s and connectors to plastic pipes

Fit cover plates and mini cocks to outlets

Fit Pipe insulation over pipes

Fit Tapware/ mixers

Glue jointing closed cell elastomeric pipe insulation

Install cistern and flush pipe

Install damp proof membrane to trimmers/noggings prior to brass fittings

Install dishwasher

Install electric storage hot water service (HWS)

Install gas instantaneous hot water service (HWS)

Install hand basins

Install hot and cold water fist fix plumbing (Steel framed)

Install hot and cold water fist fix plumbing (Timber framed)

Install sinks/ troughs

Install Stopcock valve

Install suspended pipework to underside of concrete slab

Install suspended pipework to underside of roof purlins

Install temporary caps to fixtures

Install toilet (WC Pan)

Install trimmers/ noggings to steel framing

Install trimmers/ noggings to timber framing

Install W45 Brass male lugged elbows, breaching pieces and mixers to steel frame

Install Zip Autoboil

Installation of baths

Installation of Gas storage hot water system (HWS)

Installation of mechanical masonry anchors

Installation of underfloor plumbing and drains

Installation of UPVC pipe

Isolate water to premises

Lift member using a forklift and lifting jib  
Load skid steer excavator onto truck/ trailer using aluminium ramps  
Mark out studwork for trimmer and fixture locations  
Pipe freezing using liquid nitrogen  
Plug the unit into the power supply outlet  
Plumbing final fit  
Pressure testing of hot and cold pipework  
Run copper plumbing pipework and fit off  
Run plastic water/ gas pipework and fit off  
Secure W45 Brass male lugged elbows, breaching pieces and mixers  
Service and replacement of TMV in masonry wall  
Sleeve and apply silicone around pipework passing through holes  
Test the property's gas pipework for pressure leaks  
Unpack fixtures/ materials  
Welding copper tube  
Welding/ silver soldering copper pipes together  
Working in open trench

#### End of Industry Specific: Plumbing

#### Precast

Joint Caulking

#### End of Industry Specific: Precast

#### Rigging

Industrial rope access  
Installation of Columns - Using a Crane  
Installation of steel cable

#### End of Industry Specific: Rigging

#### Roof Plumbing

Apply silicone to joint  
Creating Roof Penetrations  
Cut Insulated Panel with a circular saw  
Cut metal roof sheets with battery powered shears  
Cut metal roof sheets with electric shears  
Cut metal wall sheets with battery powered shears  
Cutting Roof Sheets with snips  
Fit angles and trims using a battery powered drill and pop rivets  
Form and Flash Roof Penetrations  
Install Box Gutter with saddles straps and gutter board  
Install Pierced Fixed Roof Sheets using a battery powered drill  
Install Safety Anchors to an existing roof (Timber from above and below)  
Install Stone Sheeting  
Install Temporary Edge Protection  
Install Temporary Edge Protection from an EWP  
Install top hats to steel structure  
Install variable pitch roof ventilators to metal roof  
Installation of Air-Cell Insulation

Installation of Anchorpoints to existing roof  
Installation of concealed clip roof decking  
Installation of Downpipes  
Installation of Eaves Gutters  
Installation of fascia cladding - From a scaffold  
Installation of fascia cladding - From a scissor lift  
Installation of Flashings using a battery powered drill  
Installation of insulation to roof  
Installation of insulation to walls  
Installation of metal battens  
Installation of metal Fascia  
Installation of Metal Fascias from ladder  
Installation of Rain Water Head  
Installation of Roof Sheets – To Sprung Curved Roof  
Installation of roof vents  
Installation of Roof walkway  
Installation of Safety Mesh from Roof  
Installation of Safety Mesh to roof area - From EWP  
Installation of Safety Mesh to roof area - From Scaffold  
Installation of Safety Mesh to Roof From Roof and Scissor Lift on one side  
Installation of Soffit Sheeting - From EWP  
Installation of Soffit Sheeting - From Scaffold  
Installation of Static line system  
Installation of Support Mesh to walls - Using Scissor Lift  
Installation of Temporary Height Safety System - starting from Scissor  
Installation of Temporary Height Safety System - to Existing roof from Scaffold  
Installation of Temporary Height Safety System to new roof  
Installation of Temporary Static Line  
Installation of top hats to masonry wall  
Installation of UPVC Pipe  
Installation of vent ridge  
Installation of wall sheeting from Ground and Boom Lift  
Installation of wall sheeting from Ground and Scaffold  
Installation of wall sheeting from Ground and Scissor Lift  
Installing External/ Internal Downpipes  
Installing Rain Water Heads  
Installing Roof Sheets – To Flat Roof Area  
Load materials into boom lift  
Loading Roof Sheets or materials with Crane  
Measure Roofing using temporary Anchor Points  
Moving materials over the roof  
New-Roofing (Domestic)  
Passing up Roof Sheets and Accessories from the ground  
Re-fall box gutter  
Removal of Asbestos products

Removal of Ceiling Sheets  
 Removal of Existing (Flat Roof)- Roof Sheeting  
 Removal of existing Blanket insulation  
 Removal of existing Box Gutter  
 Removal of existing ceiling flashings  
 Removal of existing Ceiling Insulation from open roof  
 Removal of existing roof flashings  
 Removal of existing Roof Sheeting and Aceesories  
 Removal of existing roof tiles  
 Removal of Existing RWH  
 Removal of materials from roof area by hand - Using EWP  
 Removal of wall sheeting  
 Remove all materials, equipment and waste from site  
 Remove and reinstate dektites  
 Remove and Reinstate Roof Screws  
 Remove and reinstate Skylight sheeting  
 Re-Roofing  
 Roof Plumbing Servicing and Maintenance  
 Visual Inspection of Structure

End of Industry Specific: Roof Plumbing

Roof Tiling

Re-bed tiled roof ridge capping  
 Carrying mortar in a bucket to work area  
 Mix mortar in a wheel barrow  
 Place tile onto mortar bed and trowel off  
 Replace broken roof tiles  
 Repointing of ridge tiles  
 Set up mortar bed formwork frame

End of Industry Specific: Roof Tiling

Scaffolder

Erecting, Altering and Dismantling Prefabricated Steel Modular Scaffolding  
 Erection and use of a steel tube scaffold  
 Erection and use of aluminium tube scaffold  
 Installation of cantilevered K-Stage Modular Steel Scaffold  
 Installation of K-Stage Modular Steel Scaffold

End of Industry Specific: Scaffolder

Seating

Attach platform to wall bracket  
 Install Drive Motor to Platform Frame  
 Install end safety rails to Retractable platforms  
 Installation of Chair Modules  
 Installation of fixed stadium seating (complete Job)  
 Installation of fixing brackets to concrete  
 Installation of Plywood Decks  
 Installation of retractable stadium seating

## End of Industry Specific: Seating

### Shelving and Racking

- Assemble Frames and bolt together
- Dismantling of Pallet Racking
- Install handrails to platform
- Install horizontal racking beams from a scissor lift
- Install horizontal racking beams from ground
- Install staircase assembly using a forklift and lifting jib
- Installation of cantilever racking
- Installation of Longspan shelving
- Installation of Pallet Racking
- Installation of Pallet Racking (complete job)
- Installation of Static Shelving
- Installation of Stock Picking Racking
- Level racking and bolt to slab
- Manually lower installed rack frames to the ground
- Pigeon Hole Rack Assembly (Complete Job)
- Remove horizontal racking beams from a scissor lift
- Remove horizontal racking beams from ground
- Stand up pre-assembled rack frames
- Stand up pre-assembled rack frames using a Forklift and Rack Frame Lifting Jib

## End of Industry Specific: Shelving and Racking

### Solid Plastering

- Chip out loose concrete/ cement or render with scabbling hammer
- Clean masonry surface using an electric grinder and cup disc
- Mix acrylic render in a bucket using an electric drill
- Rendering/ solid plastering
- Trowel acrylic render onto surface

## End of Industry Specific: Solid Plastering

### Steel Fixer

- Cut steel reinforcing using bolt cutters
- Place steel reinforcing in footing

## End of Industry Specific: Steel Fixer

### Structural Steel

- Claim work area on rail line
- Cleaning steel using a battery powered grinder with a wire brush attachment
- Cleaning steel using an electric grinder with a wire brush attachment
- Concrete filling of Columns by bucket
- Coring concrete
- Crane Set Up
- Cutting Steel with an Oxy- Torch
- Drill hole using a magnetic drill
- Grout Columns
- Inject Epoxy into holes
- Install connecting bolts and tension nuts using a battery powered rattle gun

Installation of Ball Tube Handrail  
Installation of Chem Anchors onto existing masonry surface  
Installation of Chem Anchors onto existing masonry wall  
Installation of Columns by hand  
Installation of Dynabolts  
Installation of Floor Grating  
Installation of Girts - Using an EWP  
Installation of Hold Down bolts into existing Concrete  
Installation of Roof Purlins - Using a Crane  
Installation of Steel Members - Using an EWP  
Installation of Steel Bracing Members - Using an EWP  
Installation of Steel Members - Using a Crane  
Installation of Steel members by hand  
Installation of Wall plate by Hand  
Installing Bolts through existing concrete slab  
Land Column into position with Crane  
Land Member into position using crane  
Lift members into position by hand  
Lifting materials using duct lifters  
Lifting members using a chain block  
Removal of Steel Members by hand using EWP  
Tension nuts using a battery powered rattle gun  
Welding cleats to existing structure with a portable electric welder

#### End of Industry Specific: Structural Steel

#### Wall and Ceiling Linings

Cut fibre cement sheet using an electric circular fibre cement saw  
Cut plasterboard using a key hole plasterboard saw  
Flushing to screws and joints in linings  
Install fibre cement linings  
Install suspended ceiling grid  
Installation of insulation Batts to wall and ceiling framing  
Installation of plasterboard linings  
Installing Cement Sheet Cladding  
Manufacture Steel Stud Wall Frames  
Sanding of flushed joints by hand  
Sanding of flushed joints using an electric drywall / plasterboard sander

#### End of Industry Specific: Wall and Ceiling Linings

#### Wall and Floor Tiling

Cut tiles using an angle grinder  
Grout tiles  
Laying floor tiles  
Laying wall tiles  
Mix adhesive in a bucket using an electric drill  
Mix grout in a bucket using an electric drill  
Mixing cement with a portable electric mixer

Placing a cement screed  
Remove existing grout between tiles  
Wall and floor tiling to domestic residence  
Wash out bucket

End of Industry Specific: Wall and Floor Tiling

Windows and Doors

Cork joint with Polyurethane sealant  
Install aluminium door frame into existing masonry opening  
Install preassembled window frame into existing opening and screw fix  
Installation of Aluminium Doors and Door Hardware  
Installation of Wooden Doors and Door Hardware using battery powered tools

End of Industry Specific: Windows and Doors

End of Industry Type: Construction

Healthcare & Medical

Aged Care

Dealing with people with dementia or aggression

End of Industry Specific: Aged Care

Homecare

Assist client in and out of a chair

End of Industry Specific: Homecare

Physiotherapy

In home Physiotherapy

End of Industry Specific: Physiotherapy

End of Industry Type: Healthcare & Medical

Hire and Rental

Hire and Rental

Delivery, cleaning and removal of portable toilets

End of Industry Specific: Hire and Rental

End of Industry Type: Hire and Rental

Horticulture

Arboriculture

Clearing and Grubbing Highway (complete job)  
Climb Tree  
Climb Tree to lop branches  
Cut tree using a petrol powered chainsaw  
Cut tree using petrol powered pole saw  
Felling of tree from the ground - not requiring a climber  
Felling of tree using Climbing Technique  
Inspection and use of petrol powered chainsaw  
Load stump grinding machine onto trailer using aluminium ramps  
Mulching of trees and branches using a Brush/ Wood Chipper  
Mulching of trees and branches using a Brush/ Wood Chipper (extended version)  
Put on Harness and set up ropes  
Safety check and operation of Excavator for clearing and grubbing  
Safety Inspection and use of Hydraulic Harvester Head attachment

Stump Grinding

Unload stump grinding machine from trailer using aluminium ramps

End of Industry Specific: Arboriculture

Landscape Horticulture

Clear the area and move existing pot plants

Pruning with Hand Pruners/ Shears (Secateurs)

Safety Inspection and use of Horizontal Grinder

End of Industry Specific: Landscape Horticulture

Parks and Gardens

Carrying green waste by hand

Control of pedestrians through work area

Discovery of syringes or needles/ sharps

Herbicide Spraying by hand

Inspection and use of petrol powered Brushcutter/ Grass Trimmer

Inspection and use of petrol powered walk behind lawn mower

Inspection and use of skid steer mounted slasher

Inspection and use of tractor mounted slasher

Load Tractor/ ride on lawnmower onto trailer using aluminium ramps

Loading and dragging bags of waste to bin or vehicle

Mulching of garden waste using a petrol-powered mulcher

Prune branches using hand operated extendable pole pruner or pole saw

Spreading fertilizer and manure

Spreading mulch by bucketing and spreading with shovel and rake

Spreading soil with Shovel and Rake

Unload tractor/ ride on lawnmower from trailer using aluminium ramps

Working beneath large fig trees

Working on sloping/ steep ground

Working outside in the sun

Working with spikey plants

End of Industry Specific: Parks and Gardens

End of Industry Type: Horticulture

Pest Control

Ant, Insect and spider control

Pesticide spraying by hand

End of Industry Specific: Ant, Insect and spider control

Feral animal control

Aerial Shooting and Baiting from helicopters

Automated corral trapping

Foot hold trapping

Ground Baiting using 1080 poison

Safety inspection and use of firearms for hunting

End of Industry Specific: Feral animal control

End of Industry Type: Pest Control

Primary Industries

Livestock Grazing

Aerial Mustering  
Inspect and Drive Off Road Vehicle/ 4WD  
Inspection and use of Tractor  
Mustering using Off Road and 4WD vehicles

End of Industry Specific: Livestock Grazing

End of Industry Type: Primary Industries

Security

Security Patrols

Check and Lock down pool area  
Check Carpark  
Check exterior of premises  
Check Gymnasium  
Internal Patrols of Student Accommodation  
Patrol of Student Accommodation Facility

End of Industry Specific: Security Patrols

End of Industry Type: Security

Traffic Management

Traffic control

Establish a Safe Work Zone-Working on or adjacent road (Traffic Control)  
Traffic control in night conditions  
Traffic control station set up and operation of traffic control (Stop/ slow bat)

End of Industry Specific: Traffic control

End of Industry Type: Traffic Management

Transport

Truck

Deliver materials to site and unload manually  
Delivery and unloading of mobile plant  
Driving long distances  
Inspect and drive truck  
Loading materials onto truck by hand

End of Industry Specific: Truck

End of Industry Type: Transport

Waste and resource recovery

Construction and Demolition

Changeover of skip bin  
Delivery of skip bin  
Pick up filled skip bin

End of Industry Specific: Construction and Demolition

Liquid waste

Pump out domestic septic tank using a vacuum truck  
Pump out grease trap tank using a vacuum truck  
Pump out waste milk using a vacuum truck  
Removal of liquid waste milk

End of Industry Specific: Liquid waste

End of Industry Type: Waste and resource recovery
